Yucesan, G., 287

Subject index of volume 154

Abrasion
computer image analysis of abrasion debris, 1
on the abrasive–corrosive wear of aluminium alloys, 305
Adhesion
fretting on silver-plated copper contact terminals of rectangular electrical connector assemblies, 125
Alkyl aryl sulphides
load carrying characteristics of reaction films of alkyl aryl sulphides, 349
Alloys
analysis of the scribing technique for determining the corrosive wear of an Fe–21wt.%Cr–19wt.%Ni alloy, 387
on the abrasive–corrosive wear of aluminium alloys, 305
surface features on a low alloy steel exposed in a simulated fluidized bed combustor environment, 269
Aluminium
on the abrasive–corrosive wear of aluminium alloys, 305

Boron carbide
tribochemical interaction of boron carbide against steel, 133

Cast iron
wear behaviors of chromium bearing cast iron in wet grinding, 241
Ceramics
study on fracture characteristics on ceramic cutting tools (first report), 361
the effect of microstructure on wear modes of ceramic materials, 371
tribochemical interaction of boron carbide against steel, 133
water-lubricated pin-on-disc tests with ceramics, 37
Chromium
analysis of the scribing technique for determining the corrosive wear of an Fe–21wt.%Cr–19wt.%Ni alloy, 387
the effect of indenter shape on the transient current response and surface microstructures in Fe–16wt.%Cr–16wt.%Ni alloy, 49
wear behaviors of chromium bearing cast irons in wet grinding, 241
Computer image analysis
computer image analysis of abrasion debris, 1
Copper
fretting on silver-plated copper contact terminals of rectangular electrical connector assemblies, 125
the role of copper compounds as fillers in the transfer and wear behaviour of polyetheretherketone, 151
the role of copper compounds as fillers in transfer film formation and wear of nylon, 207
Corrosion
analysis of the scribing technique for determining the corrosive wear of an Fe–21wt.%Cr–9wt.%Ni alloy, 387
aqueous corrosion of plain carbon steel during sliding wear, 167
on the abrasive–corrosion wear of aluminium alloys, 305
Cutting tools
study on fracture characteristics on ceramic cutting tools (first report), 361

Damping research
effect of lubrication on slip damping, 65
Deformation
motion-induced sub-surface deformation wear mechanism, 193
Delamination
fretting on silver-plated copper contact terminals of rectangular electrical connector assemblies, 125

Elastic deformation
on the experimental verification of the Greenwood–Williamson model for the contact of rough surfaces, 115

Elastohydrodynamic lubrication
thermal elastohydrodynamic lubrication of rolling and sliding contacts with a power lay fluid, 77
Electrical connector assemblies
fretting on silver-plated copper contact terminals of rectangular electrical connector assemblies, 125
External vibrations
static and dynamic friction processes under the influence of external vibrations, 177

Filtering profilometer
the effect of filtering profilometer data on fractal parameters, 109
Fluidized bed combustor
characteristics of scale layers on steels in fluidized bed combustor service, 331
surface features on a low alloy steel exposed in a simulated fluidized bed combustor environment, 269
Four-lobe bearing
stability of submerged four-lobe oil journal bearings under dynamic load, 95
Fractal parameters
the effect of filtering profilometer data on fractal parameters, 109
Fracture
study on fracture characteristics on ceramic cutting tools (first report), 361
Fretting
fretting on silver-plated copper contact terminals of rectangular electrical connector assemblies, 125
Friction processes
static and dynamic friction processes under the influence of external vibrations, 177
Frictional force
static and dynamic friction processes under the influence of external vibrations, 177

Indenter shape
the effect of indenter shape on the transient current response and surface microstructures in Fe–16wt.%Cr–16wt.%Ni alloy, 49
Iron
analysis of the scribing technique for determining the corrosive wear of an Fe–21wt.%Cr–19wt.%Ni alloy, 387
the effect of indenter shape on the transient current response and surface microstructure in Fe–16wt.%Cr–16wt.%Ni alloy, 49
the generation of wear debris of different morphology in the running-in process of iron and steels, 259

Journal bearings
on the stability of a rigid rotor in turbulent finite hydrodynamic journal bearings, 11
stability of submerged four-lobe oil journal bearings under dynamic load, 95
turbulent hybrid journal bearing with porous bush: a steady state performance, 23

Layer formation
mechanisms of built-up layer formation on turning tools: influence of tool and workpiece, 225
Load-carrying
load carrying characteristics of reaction films of alkyl aryl sulphides, 349
Load-carrying capacity
prediction on the load-carrying capacity of workpieces treated by the LT technique, 319
LT technique
prediction on the load-carrying capacity of workpieces treated by the LT techniques, 319
Lubrication
effect of lubrication on slip damping, 65

Microstructures
the effect of indenter shape on the transient current response and surface microstructures in Fe–16wt.%Cr–16wt.%Ni alloy, 49
the effect of microstructure on wear modes of ceramic materials, 371
Milling processes
tool wear modeling through an analytic mechanistic model of milling processes, 287

Nickel
analysis of the scribing technique for determining the corrosive wear of an Fe–21wt.%Cr–19wt.%Ni alloy, 387

the effect of indenter shape on the transient current response and surface microstructures in Fe–16wt.%Cr–16wt.%Ni alloy, 49
Nylon
the role of copper compounds as fillers in transfer film formation and wear of nylon, 207

Pin-on-disk
the role of copper compounds as fillers in the transfer and wear behaviour of polyetheretherketone, 151
Polyetheretherketone
the role of copper compounds as filler in the transfer and wear behaviour of polyetheretherketone, 151

Reaction films
load carrying characteristics of reaction films of alkyl aryl sulphides, 349
Rolling contact
thermal elastohydrodynamic lubrication of rolling and sliding contacts with a power law fluid, 77

Scale layers
characteristics of scale layers on steels in fluidized bed combustor service, 331
Scribing
analysis of the scribing technique for determining the corrosive wear of an Fe–21wt.%Cr–19wt.%Ni alloy, 387
Silicon carbide
influence of interposed wear particles on the wear and friction of silicon carbide in different dry atmospheres, 141
Silver
fretting on silver-plated copper contact terminals of rectangular electrical connector assemblies, 125
Slenderness ratios
on the stability of a rigid rotor in turbulent finite hydrodynamic journal bearings, 11
turbulent hybrid journal bearings with porous bush: a steady state performance, 23
Sliding
a motion-induced sub-surface deformation wear mechanism, 193
aqueous corrosion of plain carbon steel during sliding wear, 167
influence of interposed wear particles on the wear and friction of silicon carbide in different dry atmospheres, 141
the role of copper compounds as fillers in the transfer and wear behaviour of polyetheretherketone, 151
Sliding contact
thermal elastohydrodynamic lubrication of rolling and sliding contacts with a power law fluid, 77
Slip damping
effect of lubrication on slip damping, 65
Stability characteristics
on the stability of a rigid rotor in turbulent finite hydrodynamic journal bearings, 11
Steel
characteristics of scale layers on steels in fluidized bed combustor service, 331
surface features on a low alloy steel exposed in a simulated fluidized bed combustor environment, 269
the generation of wear debris of different morphology in the running-in process of iron and steels, 259
tribochemical interaction of boron carbide against steel, 133
Surface roughness
on the experimental verification of the Greenwood–Williamson model for the contact of rough surface, 115

Tool wear
tool wear modelling through an analytic mechanistic model of milling processes, 287
Transfer film formation
the role of copper compounds as fillers in transfer film formation and wear of nylon, 207
Transient current
the effect of indenter shape on the transient current response and surface microstructures in Fe–16wt.%Cr–16wt.%Ni alloy, 49
Tribochemical interactions
tribochemical interactions of boron carbide against steel, 133
Turbulence
on the stability of a rigid rotor in turbulent finite hydrodynamic journal bearings, 11

turbulent hybrid journal bearings with porous bush: a steady state performance, 23
Turning tools
mechanisms of built-up layer formation on turning tools: influence of tool and workpiece, 225

Water lubrication
water-lubrication pin-on-disc tests with ceramics, 37
Wear
on the abrasive-corrosive wear of aluminium alloys, 305
Wear debris
the generation of wear debris of different morphology in the running-in process of iron and steels, 259
Wear modes
the effect of microstructure on wear modes of ceramic materials, 371
Wet grinding
wear behaviors of chromium bearing cast irons in wet grinding, 241
